DEFENDANTS' AFFIDAVIT OF DIRECT TESTIMONY
ANDREA STONE, SPRINGFIELD LAW DEPARTMENT

I, Andrea Stone, on oath, do hereby state as follows:

Background, Source of Information, Definitions, and Scope of Testimony

1) My name is Andrea Stone. I currently am employed as a paralegal, working in the Springfield Law Department. I graduated from American International College in Springfield, Massachusetts with a Bachelors of Arts Degree in Political Science

2) I was asked to verify a number of calculations – provided to me in chart format -- relative to the Springfield City Council and School Committee elections for the past eight elections, in addition to calculations regarding a number of the referendum elections proposing a change in the method by which the City Council and/or the School Committee are elected. I used the official election returns for the City of Springfield to verify these calculations – all of which are provided as exhibits in this case. I was informed that the following information was used in the creation of the following charts i) 2000 Census information for the City of Springfield available by precinct from MassVote (www.massvote.org); ii) 1990 Census data by precinct for the City of Springfield (total population, only) provided by the Office of the Secretary of the Commonwealth prepared by Election Data Services, Inc.; iii) actual registration and turnout information provided by the Office of the Election Commission for elections 2000-2006. I did not, however, verify the accuracy of the data or any other calculations than those that are

reflected in the Excel charts. These charts that I created are attached as Exhibits A-I, L, R, S, and T to this affidavit and are otherwise designated as exhibits in this case.

3) All election returns and records upon which calculations were made relate to the November election (and not any primary conducted in September).

a) According to the official records of the Election Commission of the City of Springfield, “registered voters” include both “active” and “inactive” voters. M.G.L. c.51, §§37, 37A

b) The official election returns for the City of Springfield use the word “ballot” to mean “electoral choice.” Accordingly, for each person who casts a vote in a municipal election, there is one ballot for mayor, nine ballots for City Council and three for School Committee. There is no anti-single shot voting prohibition and only a maximum – but no minimum – number of ballots that voters are permitted to cast in each contest. Where voters fail to cast all of the prescribed number of ballots for each contest, “blank” ballots result.

c) “Turn-out” is defined as the proportion of the registered voter population who turned out to -- and did -- vote in the election at issue. Turn-out data is provided by precinct in the 2000, 2001, 2002, 2003, 2004, 2005, and 2006 official election returns for the City of Springfield. In contrast, many of these calculations related to the proportion of those persons who turned out to vote (in a ward, precinct, or citywide) who cast a ballot for a particular candidate or proposition.

4) I offer no testimony as to the meaning of any of the individual calculations or charts comprised of numerous calculations – only their accuracy, the method by which the calculations were made, and the data upon which I relied. In many cases I used an “Excel” program that made the calculations based upon the data that I entered

Charts and Results of Calculations

Chart A

5) According to the official election returns for the City of Springfield, Chart A (attached) provides the following percentage for each of the City’s 64 precincts and each of the Black/African American and/or Hispanic/Latino candidates in the 1991 and 1993 Springfield City Council elections: *persons casting a ballot for each of the candidates as a proportion of the total number of persons voting in each precinct, i.e., the proportion of the voters who cast one of their nine votes for identified minority candidates.* The following method (or “formula i”) of calculation is used to derive these percentages:

Number of votes received by identified candidate in identified precinct x 100
Number of voters casting ballots in identified precinct

Where only the total number of “ballots” cast (see supra at ¶3(b)) is provided in the official election returns, the following method of calculation (or “formula ii”) is used to derive the number of voters in each precinct:

Number of ballots

9

In addition, Charts A₁ (attached) provides the following percentage for each of the City’s 8 wards for each of the candidates in the 1991 and 1993 Springfield City Council elections: *persons casting a ballot for each of the candidates as a proportion of the total number of persons voting in each ward, i.e., the proportion of the voters who cast one of their nine votes for identified candidates.*

Chart B

6) According to the official election returns for the City of Springfield, Chart B (attached) provides the following percentage for each of the City’s 64 precincts and each of the Black/African American and/or Hispanic/Latino candidates in the 1995 and 1997 Springfield City Council elections: *persons casting a ballot for each of the candidates as a proportion of the total number of persons voting in each precinct, i.e., the proportion of the voters who cast one of their nine votes for identified minority candidates.* (formula i) (where only the total number of ballots per precinct is provided in the official election returns, formula ii)

In addition, Charts B₁ (attached) provides the following percentage for each of the City’s 8 wards for each of the candidates in the 1995, and 1997 Springfield City Council elections: *persons casting a ballot for each of the candidates as a proportion of the total number of persons voting in each ward, i.e., the proportion of the voters who cast one of their nine votes for identified candidates.*

Chart C¹

7) According to the official election returns for the City of Springfield, Chart C (attached) provides the following percentage for each of the City’s 64 precincts, each of the City’s eight wards, and each of the candidates (regardless of race or ethnicity) in the 1999 Springfield City Council election: *persons casting a ballot for each of the candidates as a proportion of the total number of persons voting in each precinct/ward, i.e., the proportion of the voters who cast one of their nine votes for each of the identified candidates.* (formulas i and ii) Ward totals are obtained by tallying the number of voters in the eight precincts (A-H) comprising each ward. The chart

¹In addition to the Excel chart identified as Chart C, in which the proportion of the vote (and the number of the votes) in each precinct and ward are calculated for each candidate, the chart that I was given provides the proportion of the vote received by each candidate by precinct and ward, but also provides the proportion of blank ballots and the proportion of the citywide total vote represented by the vote in each precinct and ward, see discussion ¶7.

that was provided to me and included with this affidavit also computes *the proportion of blank ballots, i.e., choices unexercised* and includes the following percentage: *persons who cast ballots in each precinct and in each ward as a proportion of the citywide total of those persons casting ballots in the 1999 municipal election.*

Chart D²

8) According to the official election returns for the City of Springfield, Chart D (attached) provides the following percentage for each of the City's 64 precincts, each of the City's eight wards, and each of the candidates in the 2001 Springfield City Council election: *persons casting a ballot for each of the candidates as a proportion of the total number of persons voting in each precinct/ward, i.e., the proportion of the voters who cast one of their nine votes for each of the identified candidates.* (formulas i and ii) Ward totals are obtained by tallying the number of voters in the eight precincts (A-H) comprising each ward. One of the charts that was provided to me also computes *the proportion of blank ballots, i.e., choices unexercised.* Another of the charts that was given to me and included with this affidavit provides the following: a) *persons who cast ballots in each precinct and each ward as a proportion of the citywide total of those persons casting ballots in the 2001 municipal election;* and b) *persons who cast ballots in each precinct and each ward as a proportion of total number of registered voters.*

Chart E³

9) According to the official election returns for the City of Springfield, Chart E (attached) provides the following percentage for each of the City's 64 precincts, each of the City's eight wards, and each of the candidates in the 2003 Springfield City Council election: *persons casting a ballot for each of the candidates as a proportion of the total number of persons voting in each precinct/ward, i.e., the proportion of the voters who cast one of their nine votes for each of the identified candidates.* (formulas i and ii) Ward totals are obtained by tallying the number of voters in the eight precincts (A-H) The charts that were given to me also include computation of a) *the proportion of blank ballots, i.e., choices unexercised;* b) *persons who cast ballots in each precinct and each ward as a proportion of the citywide total of those persons casting ballots in the 2003 municipal election;* and c) *persons who cast ballots in each precinct and each ward as a proportion of total number of registered voters*

² In addition to the Excel chart identified as Chart D, in which the proportion of the vote (and the number of the votes) in each precinct and ward is calculated for each candidate, the two charts that I was given are included. The first chart provides the proportion of the vote received by each candidate by precinct and ward, but also provides the proportion of blank ballots, the proportion of the citywide total vote represented by the vote in each precinct and ward and the proportion of the registered voter population in each precinct and ward who turned out to vote. The second chart that was given to me provides the proportion of the vote received by each candidate by precinct and ward, but also provides the proportion of the voting age population who were Hispanic, African American, and white (according to the 2000 Census).

³ In addition to the Excel chart identified as Chart E, in which the proportion of the vote (and the number of the votes) in each precinct and ward is calculated for each candidate, the two charts that I was given are included. The first chart (that was given to me) provides the proportion of the vote received by each candidate by precinct and ward, but also provides the proportion of blank ballots, the proportion of the citywide total vote represented by the vote in each precinct and ward and the proportion of the registered voter population in each precinct and ward who turned out to vote. The second chart provides the proportion of the vote received by each candidate by precinct and ward, but also provides the proportion of the voting age population who were Hispanic, African American, and white (according to the 2000 Census).

Chart F⁴

10) According to the official election returns for the City of Springfield, Chart F (attached) provides the following percentage for each of the City's 64 precincts, each of the City's eight wards, and each of the candidates in the 2005 Springfield City Council election: *persons casting a ballot for each of the candidates as a proportion of the total number of persons voting in each precinct/ward, i.e., the proportion of the voters who cast one of their nine votes for each of the identified candidates.* (formulas i and ii) Ward totals are obtained by tallying the number of voters in the eight precincts (A-H) The charts that were given to me also provide a calculation of a) *the proportion of blank ballots, i.e., choices unexercised*; b) *persons who cast ballots in each precinct and each ward as a proportion of the citywide total of those persons casting ballots in the 2005 municipal election*; and c) *persons who cast ballots in each precinct and each ward as a proportion of total number of registered voters.*

Chart G

11) According to the official election returns for the City of Springfield, Chart G (attached) provides the following percentage for each of the City's 64 precincts and each candidates in the 1991, 1993, 1995, 1997, 1999, and 2001 Springfield School Committee elections: *persons casting a ballot for each of the candidates as a proportion of the number of persons voting in each precinct, i.e., the proportion of the voters who cast one of their three votes for identified candidates.* (formula i).

Chart H⁵

12) According to the official election returns for the City of Springfield, Chart H (attached) provides the following percentage for each of the City's 64 precincts, each of the City's eight wards, and each of the candidates in the 2003 Springfield School Committee election: *persons casting a ballot for each of the candidates as a proportion of the total number of persons voting in each precinct/ward, i.e., the proportion of the voters who cast one of their nine votes for each of the identified candidates.* (formulas i and ii) Ward totals are obtained by tallying the number of voters in the eight precincts (A-H) The charts that were given to me also include a calculation of a) *the proportion of blank ballots, i.e., choices unexercised*; b) *persons who cast ballots in*

⁴ In addition to the Excel chart identified as Chart F, in which the proportion of the vote (and the number of the votes) in each precinct and ward is calculated for each candidate, the three charts that were provided to me have been included. The first chart provides the proportion of the vote received by each candidate by precinct and ward, the proportion of the citywide total vote represented by the vote in each precinct and ward, and the proportion of the registered voter population in each precinct and ward who turned out to vote. The second chart provides the proportion of the vote received by each candidate by precinct and ward, but also provides the proportion of the voting age population who were Hispanic, African American, and white (according to the 2000 Census). The third chart provides the proportion of the vote received by each candidate by precinct and ward, as well as the proportion of blank ballots and the proportion of the registered voter population in each precinct and ward who turned out to vote

⁵ In addition to the Excel chart, identified as Chart H, in which the proportion of the vote (and the number of the votes) in each precinct and ward is calculated for each candidate, the two charts that were provided to me have been included. The first chart that was given to me provides the proportion of the vote received by each candidate by precinct and ward, but also provides the proportion of blank ballots, the proportion of the citywide total vote represented by the vote in each precinct and ward and the proportion of the registered voter population in each precinct and ward who turned out to vote. The second chart provides the proportion of the vote received by each candidate by precinct and ward, but also provides the proportion of the voting age population who were Hispanic, African American, and white (according to the 2000 Census).

each precinct and each ward as a proportion of the citywide total of those persons casting ballots in the 2003 municipal election ; and c) persons who cast ballots in each precinct and each ward as a proportion of total number of registered voters (formula v)

Chart I⁶

13) According to the official election returns for the City of Springfield, Chart I (attached) provides the following percentage for each of the City's 64 precincts, each of the City's eight wards, and each of the candidates in the 2005 Springfield School Committee election: *persons casting a ballot for each of the candidates as a proportion of the total number of persons voting in each precinct/ward, i.e., the proportion of the voters who cast one of their nine votes for each of the identified candidates.* (formulas i and ii) Ward totals are obtained by tallying the number of voters in the eight precincts (A-H) Chart I also computes a) *the proportion of blank ballots, i.e., choices unexercised;* b) *persons who cast ballots in each precinct and each ward as a proportion of the citywide total of those persons casting ballots in the 2005 municipal election;* and c) *persons who cast ballots in each precinct and each ward as a proportion of total number of registered voters*

Chart L⁷

14) The voters of the City of Springfield were provided an opportunity to vote for a change in the method by which members of the City Council and School Committee were elected in the following municipal elections: 1959, 1963, 1977, 1987, and 1997. According to the official election returns for the City of Springfield, Chart L (attached) provides the following percentages: a) *the number of "yes" votes as a proportion of the total number of voters casting ballots in each of the eight wards;*

Total number of "yes" votes in each identified ward x 100
Total number of persons casting ballots in each identified ward⁸

b) *the number of "no" votes as a proportion of the total number of voters casting ballots in each of the eight wards;*

Total number of "no" votes in each identified ward x 100
Total number of persons casting ballots in each identified ward

⁶ In addition to the Excel chart, identified as Chart I, in which the proportion of the vote (and the number of the votes) in each precinct and ward is calculated for each candidate, the two additional charts that were given to be are provided. The first chart provides the proportion of the vote received by each candidate by precinct and ward, but also provides the proportion of blank ballots, the proportion of the citywide total vote represented by the vote in each precinct and ward and the proportion of the registered voter population in each precinct and ward who turned out to vote. The second chart provides the proportion of the vote received by each candidate by precinct and ward, but also provides the proportion of the voting age population who were Hispanic, African American, and white (according to the 2000 Census).

⁷ Charts J and K have been eliminated

⁸ The "total number of persons casting ballots" is comprised of all persons who cast a ballot for at least one municipal office, including those who left referendum question concerning change in the method of electing members to the Springfield City Council and School Committee "blank"

c) the number of blank ballots as a proportion of the total number of voters casting ballots in each of the eight wards;

Total number of "blank" referendum ballots in each identified ward x 100
Total number of persons casting ballots in each identified ward

and d) the proportion of voters casting ballots in each ward as a proportion of the total number of voters casting ballots in the city as a whole. (formula iii)

Chart R⁹

15) According to the official election returns for the City of Springfield, Chart R (attached) provides the following percentage for each of the City's then-74 precincts, each of the City's eight wards, and each of the candidates in the 1981 Springfield School Committee election: *persons casting a ballot for each of the candidates as a proportion of the number of persons voting in each precinct, i.e., the proportion of the voters who cast one of their three votes for each of the identified candidates.* (formulas i). Ward totals are obtained by tallying the number of voters in the precincts comprising each ward.

Chart S

16) According to the official election returns for the City of Springfield, Chart S (attached) provides the following percentage for each of the City's 64 precincts, each of the City's eight wards for Robert McCollum in his 1989, 1991, 1995, 1999, and 2003 School Committee contests *persons casting a ballot for candidate as a proportion of the number of persons voting in each precinct, i.e., the proportion of the voters who cast one of their three votes for candidate.* (formulas i). Ward totals are obtained by tallying the number of voters in the precincts comprising each ward.

Chart T

17) According to the official election returns for the City of Springfield, Chart T (attached) provides the following percentage for each of the City's 64 precincts, each of the City's eight wards for Carmen Rosa in her 1993 School Committee contest: *persons casting a ballot for candidate as a proportion of the number of persons voting in each precinct, i.e., the proportion of the voters who cast one of their three votes for candidate.* (formulas i). Ward totals are obtained by tallying the number of voters in the precincts comprising each ward.

Signed under penalties of perjury this 14th day of February, 2007.

 Andrea L. Stone

⁹ Charts O-Q have likewise been eliminated.

CERTIFICATE OF SERVICE

I hereby certify that a copy of the foregoing "Defendants' Affidavit of Direct Testimony Andrea L. Stone. Paralegal, City of Springfield, Law Department" has been served on the following counsel of record on the 15th day of February 2007, via the ECF system and will be sent electronically to the registered participants as identified on the Notice of Electronic Filing (NEF).
